Tourniquet Systems

Electric Tourniquets / Compressed Air Tourniquet / Manual Tourniquet
Tourniquet Cuffs / Tourniquet Consumables / Pressure Infusion
Find our full range of products on [www.vbm-medical.de](http://www.vbm-medical.de)
Here you will find our media centre with additional information such as application videos, brochures, flyers etc.

**Disclaimer:**
This advertising material includes information of the complete VBM medical device product range. Whether a medical device is available / approved in your region must be inquired. Please contact your VBM customer service.

The medical devices in this catalogue are manufactured without the use of natural rubber latex, unless otherwise specified. The medical devices in this catalogue do not contain phthalates which require labelling according to CLP Regulation (EC) 1272/2008.
Electric Tourniquets
- Tourniquet Touch TT20
- Tourniquet Touch TT15
- Mobile Stand and Basket

Compressed Air Tourniquet
- Tourniquet 2500

Manual Tourniquet
- Manual Tourniquet

Tourniquet Cuffs
- Tourniquet Dispo Cuff
- Tourniquet Wipe Cuff
- Tourniquet Silicone Cuff

Tourniquet Consumables
- Measuring Tape
- Tourniquet Sleeve
- Tourniquet Drape
- Cuff Cover
- Esmarch Bandages
- Roll-On Cuff
- Accessories for Roll-On Cuff

Pressure Infusion
- Classic Infusor
- Clear Infusor
- Dispo Infusor
- Accessories for Pressure Infusion Cuffs
Electric Tourniquets

**Tourniquet Touch TT20 / TT15**
For safe regulation of blood flow occlusion during extremity surgery

The Tourniquet Touch is an electrically operated surgical tourniquet. It regulates the pressure of a tourniquet cuff which temporarily occludes the blood flow of a patient’s upper or lower extremity in order to obtain a bloodless field. User friendly innovations such as fast choice buttons and the specific alarm system simplify the use of the device and ensure patient safety. The system interface is reliable and intuitive and allows easy maintenance for the biomedical engineer (calibration, self test, leak test).

**Tourniquet Touch TT20 with Two Cuff Channels**
For use with single cuff, two single cuffs or double cuff.

**Tourniquet Touch TT15 with Cuff Channel and Irrigation Channel**
For use with single cuff and pressure infusion cuff.
Specifications

**Display**
- 8 inch (800 x 480 pixel)
- Wide viewing angle (170°)
- Low reflection, mat, anti-glare

**Battery**
- Lithium ion (14.4 V – 93.6 Wh)
- Approx. 8 h backup runtime

**USB-Port**
- Software updates
- Saving log file for device analysis

**Touch Screen**
- 100% premium glass
- Easy cleaning and disinfection
- Usable with surgical gloves

**Cuff Channel**
- Pressure range: 80 – 500 mmHg
- Alarm time: 15 – 120 minutes

**Housing**
- With integrated handle
- Very robust material
- Easy cleaning and disinfection

**Fast Choice Buttons**
- Allow to change pressure and time of preset values with only two touches
- No need to tap arrows and confirmation buttons
- Facilitate immediate pressure changes during surgical procedures

**Timer Alarm**
- Precise time monitoring during the procedure
- User is warned after reaching the set alarm time
- Extension of alarm time by 10, 20 or 30 minutes

**Intravenous Regional Anaesthesia (IVRA)**
- Safety lockout to reduce the risk of accidental cuff deflation and to prevent a sudden loss of IVRA

**Connection Irrigation Channel**
- Irrigation port with dedicated connector for pressure infusion cuff to avoid misconnection of tourniquet cuffs
- Pressure is monitored and adjusted constantly to compensate loss of pressure caused by emptying of the fluid bag

Compressed Air Tourniquet

Tourniquet 2500
For safe regulation of blood flow occlusion during extremity surgery

The Tourniquet 2500 is a compressed air operated surgical tourniquet. It regulates the pressure of a tourniquet single cuff which temporarily occludes the blood flow of a patient’s upper or lower extremity in order to obtain a bloodless field.

**Features**

**Pressure Regulator**
- Pneumatic precision pressure regulator
- Fast cuff inflation and deflation
- Pressure range 0 - 600 mmHg

**Analogue Manometer**
- No flickering during pressure settings
- Always shows the real pressure in the cuff
- Precision manometer

**Manual Back-Up System**
- Automatic change to manual system during failure of compressed air, no battery needed
- Maintenance free
- Independent from any power source

**Coil Connecting Tubing**
- Firmly connected to the device
- Stretched length 3.0 m

**Timer**
- Countdown function with audible signal
- Timer function

**Flush Button**
- To check for bleeding
- Allows deflation in manual mode

Tourniquet Dispo Cuff

Tourniquet cuff, for single use

Tourniquet Dispo Cuff is a sterile, single use tourniquet cuff especially suitable for contaminated procedures, preventing against HAI (Hospital-acquired infection). Dispo Cuff is available in straight shape (for small or midsize upper extremity) and contour shape (mainly for lower conical shaped extremity) and is provided in different sizes, which are colour coded for optimal cuff selection.

**Features**

- **Cuff Design**
  - Low profile design and lightweight
  - Large hook and loop fastener for reliable cuff fixation
  - Colour coding makes size selection and ordering easier
  - Tubing made of kink-resistant silicone material
  - Contour and straight shape
  - PVC-free

- **Packaging**
  - Packed in dispenser box (4)
  - Easy storage due to low profile packaging

- **Straight Shape**
  - Cylindrical design
  - Does not show any difference in diameter between proximal and distal part

- **Contour Shape**
  - Conical design with a smaller diameter distally than proximally when applied
  - Occludes the blood flow at lower cuff pressures due to an improved fit to the extremity
  - Integrated stiffener to prevent cuff migration

- **Connection**
  - Single cuff and double cuff with single port (1+2)
  - Single cuff with dual port for use with tourniquet systems with dual port connection (3)

- **Double Cuff for Intravenous Regional Anaesthesia (IVRA)**
  - Double cuff with 2 individually inflatable bladders (2)

Tourniquet Wipe Cuff
Tourniquet cuff, reusable through manual wipe disinfection

Tourniquet Wipe Cuff is a reusable tourniquet cuff made of durable material, suitable for repeated use after wipe disinfection. Wipe Cuff is available in straight shape (for small or midsize upper extremity) and contour shape (mainly for lower conical shaped extremity) and is provided in different sizes, which are colour coded for optimal cuff selection.

### Features

**Cuff Design**
- Low profile design and lightweight
- Large hook and loop fastener for reliable cuff fixation
- Colour coding makes size selection and ordering easier
- Tubing made of kink-resistant silicone material
- Contour and straight shape
- PVC-free

**Special Features**
- Specific inner material dries quickly after wipe disinfection and allows timely reuse of the product
- UDI code for product traceability
- Serial number for tracking of product usage
- Processable up to 100 times (wipe disinfection)

### Application Information

- Application arm
- Application leg
- Brochure
Tourniquet Silicone Cuff is top of the class when it comes to safe, reliable and economical solutions. The design and specifications allow the cuff to withstand all types of processing such as manual/wipe and automatic/thermal cleaning and disinfection. Silicone Cuff has also been validated for sterilization by steam autoclave at a temperature of 134°C for 5 minutes.

**Cuff Design**
- Silicone bladder, easy to wipe - easy to dry
- Large hook and loop fastener for reliable cuff fixation
- Colour coding makes size selection and ordering easier
- Tubing made of kink-resistant silicone material
- Contour and straight shape
- PVC-free

**Straight Shape**
- Cylindrical design
- Does not show any difference in diameter between proximal and distal part

**Contour Shape**
- Conical design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower cuff pressures due to an improved fit to the extremity
- Specific bladder design (wave pattern) to prevent cuff migration

**Double Cuff for Intravenous Regional Anaesthesia (IVRA)**
- Double cuff with 2 individually inflatable bladders

**Classic Infusor**
Pressure infusion cuff, reusable

### 500 ml and 1000 ml Version
- With double hook, for fixation of different fluid bag configurations.
- Rapid administration of an infusion solution for compensation of fluid/volume deficiency.
- Pressure monitoring and irrigation of the tubing system during invasive, arterial blood pressure monitoring.
- Transfusion.

### 3000 / 5000 ml Version
- With zipper, allows insertion of different fluid bag configurations.
- Administration of large fluid volumes for irrigation of the operation field.

The polyamide material of the Classic Infusor enables easy cleaning & disinfection. Transparent netting for a clear view on the fluid bag and the fluid level. With UDI code for product traceability.

---

**Hand Inflator with Three-Way Stopcock**
- Ergonomic hand inflator for inflation.
- Three-way stopcock for quick deflation during change of the fluid bag.

**Manometer**
- Pressure range from 0 – 300 mmHg in increments of 10 mmHg.
- Robust and durable for accurate pressure monitoring.

**Colour Coded Pressure Indicator**
- 360° pressure indicator facilitates pressure monitoring.
- Pressure relief valve to prevent over inflation.

Clear Infusor
Pressure infusion cuff, reusable

500 ml and 1000 ml Version
- Rapid administration of an infusion solution for compensation of fluid/volume deficiency
- Pressure monitoring and irrigation of the tubing system during invasive, arterial blood pressure monitoring
- Transfusion

3000 ml Version
- Administration of large fluid volumes for irrigation of the operation field

Wrap-around design allows fixation of most fluid bag configurations and even pressure distribution. The smooth surface of the PU material enables easy cleaning & disinfection. The transparent material offers a clear 360° view on the fluid bag and fluid level. With UDI code for product traceability.

Features

Hand Inflator with Three-Way Stopcock
- Ergonomic hand inflator for inflation
- Three-way stopcock for quick deflation during change of the fluid bag

Manometer
- Pressure range from 0-300 mmHg in increments of 10 mmHg
- Robust and durable for accurate pressure monitoring

Colour Coded Pressure Indicator
- 360° pressure indicator facilitates pressure monitoring
- Pressure relief valve to prevent over inflation
